HUNTING AND SPORT-SHOOTING ACCESSORIES

SAFETY DURING TRANSPORT AND STORAGE

The sport of hunting and shooting is becoming more and more popular

The sport of hunting and shooting is enjoying increasing popularity. We offer hunters and marksmen a wide range of accessories. This satisfies two requirements: Safe transport and storage of weapons.

Gun bags, cases and hunting backpacks

Our product range includes well-padded bags for rifles, shotguns as well as sporting and handguns. This allows the weapons to be transported easily and well protected. Shooting mats for sport shooters and hunting backpacks further enhance the range. Our weapon security products are supplemented by practical solutions for transport, for example in high-quality weapon cases made of aluminium or Kevlar®-reinforced plastic.

Universal trigger locks

The triggers of common long firearms and hand guns can be blocked with trigger locks. A cylinder or combination lock ensures that the triggers are no longer accessible. A rubber pad prevents the weapon from being scratched. The wall-mount trigger-locks can be used to protect weapons against illegal access. They also serve as an ideal child safety device.

RIFLE SOFT-BAGS

The bags are made of very durable 900D-Polyester-Nylon and lined with soft foam. The inside of the bags is lined with a 150D-Polyester material. On the side there are up to two ammunition- or accessory pockets. The bags have handles sewn around the bags, an additional extra-large shoulder-belt with shoulder pad, which is adjustable in length and detachable. For better security the soft-bags have a strong two-way plastic zip with a metal slider, which can be locked with a padlock.
