FRANZEN Group

Customer-specific solutions from the idea to the start of production

Complex assemblies made of diverse materials. The Franzen Group is an independent, globally active group of companies boasting more than 180 years of expertise as a development partner and manufacturer.

International group of companies with efficient production

We make use of our extensive expertise to accompany you from the initial product idea through to CAD design and series production. For each product, we select the most suitable production site. We are therefore in a position to provide the ideal combination of German engineering and cost-efficient series production with state-of-the-art, quality-oriented machine technology.

Leading manufacturer of locks and fittings for luggage, waste bin locks, mouse and rat traps

We are one of Europe's leading suppliers and producers of luggage locks, waste bin locks and mouse and rat traps. Based on our expertise, we have become the largest supplier of TSA plastic luggage locks in the non-Asian market. In North America, we are considered a pioneer and a key contact for the distribution and deployment of waste bin locks. For our customers, we are a recognized development supplier.

Broad development expertise for various branches of industry

Complex solutions from our group of companies can be used in a wide variety of industrial sectors. We offer luggage locks for the luggage industry, waste bin locks for use in municipalities and the waste management industry, locks for the furniture industry. We manufacture weapon safety devices and trigger locks for law enforcement agencies as well as hunting and shooting sports and locking systems for boxes and containers. With our extensive production depth, we offer exciting opportunities as a partner and supplier for 1st tier suppliers and OEMs in the automotive industry. Based on our complex value-added processes, we have become a leading supplier to businesses in the toy industry. Plastic parts, surfaces and complex assemblies from the companies of the Franzen Group can be found in roof windows, caravans, safety helmets, in fans, industrial suitcases, tool cases and in many other everyday goods.

Independent, value-oriented family business

As a medium-sized family business with a global orientation, we combine the proximity to our customers and markets all over the world with short decision paths and quick reactions. We think and act in a value-oriented manner, assume responsibility for our environment and ensure that our dealings with customers, partners, suppliers and employees are treated with the utmost respect.

Experienced development partner

Rapid development of customer-specific solutions

In-house development centre

In our development centre in Solingen and at our production site in the Czech Republic, we develop tailor-made solutions for our customers from various industries. Our engineers and technicians have thought through every detail of what we manufacture, every component and every design, tested it and made it ready for series production – from filigree plastic parts to complex assemblies. No matter whether a single part or a complex assembly, we accompany you from the first product idea to CAD design, production and assembly.

From the sketch to the prototype

We provide you with personal advice on the design of your products with respect to efficient production. Our developers have an extensive wealth of experience in tool design as well as production-oriented design. Because of our flat hierarchies, our paths are short, so that you can quickly obtain the very first prototype.

Everything from a single source

With development and production competence to the finished product

Franzen combines development and production expertise under one roof. This is how you can directly achieve your new product. In 8 steps, an initial idea becomes your individual solution. Developed in Germany, produced with the most modern machines and, if desired, assembled to form a subassembly.

1

Idea meets development expertise

Innovative solutions made of plastic and metal are developed on the basis of your sketch.

2

Consulting shows the way

Benefit from our know-how about optimal implementation

3

Sketch becomes digital

Our CAD experts design your product in 3D

4

Prototypes that you can actually touch

Your product quickly takes shape with us

5

Toolmaking builds on experience

This is where we show off our flexibility and experience

6

Production goes into series production

State-of-the-art and cost-efficient: our production in the Czech Republic

7

Quality is checked

Our quality management ensures consistent product quality

8

Assembly joins

We fit entire assemblies

RIFLE SOFT BAGS

The bags are made of very durable 900D-Polyester-Nylon and lined with soft foam. The inside of the bags is lined with a 150D-Polyester material. On the side there is an ammunition- or accessory pocket (approx. 24 x 16 cm). The bags have handles sewn around the bags, an additional extra-large shoulder-belt with shoulder pad, which is adjustable in length and detachable. For better security the soft-bags have a strong two-way plastic zip with a metal slider, which can be locked with a padlock.

SHOOTING RANGE PAD

This new shooting-range pad is combining in a compact way some different purposes of using: Especially for sport-shooters it is the ideal transport-bag for rifles and accessories, which can be carried well protected in some individually shaped holsters and wide pockets inside and outside of the bag.

Short version: An external back-pack belt-system, (could be covered) with large padded shoulder-protections offers high comfort in carrying, even of heavy weights. When opening the main zipper, you can unfold the pad completely. A thick padded neoprene-covered area in the front-part allows a safe positioning of the elbows. Additionally this Shooting-range pad has a second, separate outside bag (approx.. 100 x 37 cm) for ammunition or other accessories.

Long version: An external back-pack belt-system with large padded shoulder-protections offers high comfort in carrying, even of heavy weights. When opening the main zipper, you can unfold the pad completely. A thick padded neoprene-covered area in the front-part allows a safe positioning of the elbows. The unfolded leg-pads in the back-part are most comfortable for the legs while lying. The strong nylon-material is very durable and easy to clean.

GUN CASES

TSA-Lock for gun cases. For traveling into the USA this lock can be opened and the suitcase could be scanned by the administration (Transportation Security Administration). Locked cases were opened with violence therefore the "TSA-Locks" were developed to avoid damages on the cases and their locks. You can open the locks with a master key which were only hand out to TSA-employees to lock and unlock the cases. That is the reason why you do not receive any key when you buy a TSA lock. All locks which are accredited by the TSA Administration are signed with a special Logo.
